Humanize your
business with AI

manter ERP

"Let your business speak with you and speak for you!

Have you ever though, one day your company will speak with you and share their hopes and worries of themselves with you? With artificial intelligence, your businesses will behave like people with thoughts and vision.

We, with Manter ERP, introduce to you AI integrated business management, where businesses operations are automated intelligently by the businesses themselves. Manter ERP is quipped with AI features that help your business grow, understanding the best practices, challenges and hurdles to come and notify you to take necessary actions to make the business more profitable.

Great to see the increase. Can you break down the main sources of this increase?
5:20 PM ✓✓

Certainly. The increase can be attributed to:

A 15% rise in sales revenue, contributing an additional ₹17 lakhs. A decrease in operational expenses by ₹8 lakhs due to cost-saving measures implemented last quarter.
5:20 PM

What about the projected expenses for next month? Do we have enough to cover staff salaries and other operational costs?
5:20 PM ✓✓

The projected expenses for next month are as follows:

Staff salaries: ₹70 lakhs
Operational costs (rent, utilities, supplies): ₹30 lakhs
Other expenses (marketing, R&D): ₹20 lakhs

Total projected expenses: ₹1.2 crores

With the available cash of ₹1.2 crores, you are projected to break even next month.

AI Integrated WhatsApp Chat Assistant

Manter ERP is packed with AI integrated chat assistant who will communicate with the business owner through WhatsApp. The chat assistant is able to analyse the business operations, find any anomalies in department, evaluate statistics to understand profit and loss of business and convey the information with the owner through WhatsApp. Be it a query about the reason for the increase in production cost, the delay in sales, or any other escalated issues in operations, the chat assistant will answer the reasons analysing the situations based on the data in hand and will provide solution suggestions to the owner to implement.

Daily Business Overview

Manter ERP Mobile App gives a real time overhead report of the business to the owner. It is very much helpful to periodically and instantly monitor the business operations, even when your are away for meetings, or on vacation. Information like daily sales trend, trial balance, profit and loss and income and expense of each day will help you to understand the growth of business in each day without going deeper in to the operations data.

AI Trend Analysis

The integrated AI in Manter ERP helps in understanding the trends of sales through a period. Comparing the trend with previous data, AI will suggest you, which product will sell more at the certain seasons of an year. By this information provided by AI, you will have the correct awareness in making decision to increase inventory of which product for that specific period.

Intelligent Notifications

Manter ERP will notify the owners about important things understanding their criticality and actions required to take. These notifications will help you to understand the anomalies happening inside the business, like employees taking leave more than allowed, decline in sales or production, delay in purchase, fall in income or rise in expense, etc. Getting these notifications through the AI chat agent will help you to ask the chat assistant to take further actions or even suggestions for the best practice.

One solution, many ways to manage
